comment	Alex	Pappas	I grew up at 43 Spring St and my father had a resteraunt at 615 King St so I remember the buildings along King St and St Philip St before they were torn down. The current proposal is way out of proportion to the context of the surrounding 2 and 3 story buildings and will only serve to create more of a canyon along King St as other buildings will be all be built along the same height as proposed. Look at the building at King & Spring St now. It is totally without context to its surroundings. The Sanborn maps will give you the context of what was there.	6.	635 King St	null	null	Oct 25 2021 1:55PM
comment	Cindy	Wofford	This project is too big and does not take into consideration the relative scale and impact of neighboring buildings and cityscape. Please adhere to the recommendations in place regarding height and mass.	TMS # 460-	635 King Street	null	null	Oct 26 2021 7:18AM
