Be prepared for a fire:

► One of the best ways to protect yourself and your family is to have a working smoke alarm that can sound fast for both a fire that has flames, and a smoky fire that has fumes without flames. It is called a “Dual Sensor Smoke Alarm.” A smoke alarm greatly reduces your chances of dying in a fire.

► Prepare an escape plan and practice it often. Make sure everyone in your family knows at least two (2) escape routes from their bedrooms.
