Fire Service Underground System Details

- New system for new building
- New system for existing building
- Replacement of existing, add reason in notes
- Modification of existing, add reason in notes

Plans must clearly indicate the design standard(s) and edition utilized. The minimum acceptable design criterion is NFPA 24, 2016 Edition. When newer editions are utilized the editions must be clearly noted on the plans.

Installation: New Construction Renovation/Remodel of existing system

Fire Sprinkler System Type(s): None Wet Dry Pre-Action Deluge Anti-Freeze

Fire Sprinkler System: None NFPA 13 NFPA 13R NFPA 13D

Standpipes: None Auto Wet Manual Wet Auto Dry Manual Dry

Hydrants: None Public Private

Plan Submittal Checklist

The following check list is provided as a summary of the minimum information required before a review will be initiated. It is the contractor’s responsibility to have a thorough working knowledge of the applicable City, State, National Fire Protection Association (NFPA), and International Code Council (ICC) 2018 editions requirements and to include additional information specific to this system. Failure to provide information will delay the review process.

- All Projects
  1. Fire Service Underground Permit Application, 3 sets of prints, 1 set of documents (specs, etc.)
  2. Name, address, phone, fax, e-mail, and state contractor’s license number on the submitted prints.
  3. Creation date of plan, revision dates, point of compass, scale and graphic representation of scale.
Plan Submittal Checklist (continued)

All Projects (continued)
4. Complete address (include building name or suite) of project (include tenant name if known).
5. Clear and definitive scope of work for the project and the company permitting the work.
6. Size of the water mains supplying the system.
7. Location of back flow prevention vault and/or FDC.
8. Equipment cut sheets for all materials and components.
9. Thrust blocks or other approved restraint methods as allowed by 2016 NFPA 24.
10. Hydraulic calculations that demonstrate the total system demand at the needed PSI for system operation.

New Installation/Major Remodel
11. Site/plot drawings with paved roads, fire lanes, parking, and building orientation. Include locations of area hydrants and the remote FDC. FDC’s shall be labeled in accordance with City Requirements.
12. Site/plot drawings indicating location, weight/class, size and length of underground piping and materials from water source to riser. Include any valves, meters, valve pit (include pit details), depth to bury pipe, thrust blocks, etc.
13. All valves, excluding the public water system roadway valve, controlling the water supply for automatic sprinkler systems up to an including the back flow prevention device shall be electrically supervised as required by 2018 International Fire Code.
14. Provide the means to conduct a full forward flow testing of the back flow prevention device as required by 2016 NFPA 13.
15. Provide information on any hydrants to be installed; private hydrants to have the barrels painted red. The available flow to be marked on the hydrant bonnet and caps to meet NFPA 291.

Required Inspections and Documents

Testing and acceptance will be required to meet 2016 NFPA 24 requirements. Items to be reviewed or inspected include: 1) Inspection of piping and restraint system before covering, 2) Flushing of piping. Flow rate to meet NFPA 24, 3) Hydrostatic test as required by NFPA 24, 4) Underground material and test certificate, 5) Private hydrants shall be flushed and flow tested, 6) Flow rates to be marked on the hydrant with an approved method, 7) Final inspection. Additional testing may be required based on system or complexity.

Pre-Final Inspection Checklist

The contractor shall verify completion of the following items, any item from this list found outstanding at the time of the final will result in termination of the inspection and assessment of a re-inspection fee.
○ All previous inspections completed and any deficiencies corrected.
○ Installation per the submitted prints or deviations approved and as-built drawings prepared for inspector.
○ Permit, stamped drawings, plan review comments, and 3 copies of the Certificate of Underground Piping on site.

Request for review and permit

I understand and agree that this permit is only for this project and provides authorization for the limited scope of work identified on the permit and the permit remains the property of the City of Charleston. By signing below I certify that I am an authorized agent for the company performing the work stated above, appropriately trained and qualified for the scope of work proposed, and all information provided is true and correct. I understand that if any information provided is found to be incorrect or falsely stated that any permits granted from this application are immediately null and void. I agree to comply with the ordinances of this jurisdiction and to perform the work herein stated in accordance with the submitted plans, specifications, applicable codes and standards, and shall be responsible for any and all violations of state laws and local ordinances. I understand that any alteration or change in plans made without written approval subsequent to the issuance of the permit shall constitute grounds for revocation of such permit and that all work is subject to field inspections. Permit void if work is not started within six months of the date of issue or if work stops for a period of six months. All permits expire two years from the date of their issuance. Additional permits shall be required for any additional work not authorized under a permit issued for this application. Applicant is responsible for calling to schedule all required inspections.
