Scope and Content Note:

The Clerk of Council Address and Location Files consist of records associated with addresses, subdivisions, or tracts of land located in or near the City of Charleston. The records include encroachments, easements, conveyances, deeds, memorandums of understanding or agreements, and related documentation. Where possible, documents are filed under the street address. Subdivision files sometimes contain only street acceptance and dedication resolutions, but often contain easements or encroachments for common areas or lots where it is not possible to ascertain a street address. Please note that a file titled "unknown addresses" contains documents where an address is not specified and cannot be determined using available information. This collection is current through 2019 and will expand as records are received from the originating department.

This collection contains some material of archival and historical value dating primarily to the 1960s with earlier material dating as early as the 1933. Of particular interest are photographs of downtown storefronts and streetscapes dating primarily to the 1960s with a few photographs dating as early as 1947.
